

Cementation Receives 1st Annual Arizona State Mine Inspector's Safety Award.

October 7, 2009

SALT LAKE CITY –Cementation USA Inc. is honored to be the recipient of the first annual Arizona State Mine Inspector's Safety Award in the Mine Contractors category. The award was presented to Cementation at the 1st Annual Arizona State Mine Inspector (ASMI) Fall Mine Mixer and Conference in Phoenix, on October 1, 2009.

Working safely is and has been our focus every day. To be recognized for these efforts is a tribute to our employees and management team and their belief that zero injuries is an obtainable goal. The Arizona State Mine Inspector's Safety Award acknowledges Cementation's achievement of zero lost time injuries for the year 2008. The criteria for selection was based on No Lost Time Injuries in accordance with Arizona Lost Time Accident (LTA) guidelines, man hours worked, as well as the Arizona State Mine Inspector's assessments and inspections to site throughout the year. The award is open to all sectors in the mining industry; including underground, surface, open pit, sand and gravel and aggregates. As a company we are committed to conducting our projects in a safe manner and to diligently protect our employees as well as anyone else who interacts with the work or the workplace from risk of incidents and injuries.

As an underground mine contracting and engineering company; achieving zero injuries requires Clients that share the same safety culture and commitment. We would like to extend our congratulations to Resolution Mining Company LLC on receiving the Arizona State Mine Inspector's Safety Award in the Mine Operator category. Cementation has worked closely with Resolution Copper Mining at their Resolution Project near Superior, Arizona, since February of 2006. During this time, Cementation USA has worked approximately 500,000 hours without sustaining a lost time injury by carefully considering risks in advance, involving everyone, communicating well and continuously ensuring that everyone is equipped to perform safely and effectively.

Cementation would like to thank ASMI for acknowledgement of our team's efforts in the area of safety, and we extend congratulations to the other recipients. Thank you to our employees for believing that zero injuries is an achievable goal.
